**COMPLETED:**  
June 2003

**ARCHITECT:**  
Mr. Scott Straubhar  
Hummel Architects, P. A.  
2785 Bogus Basin Road  
Boise, Idaho 83702  
(208) 343-7523

**SCOPE OF WORK:**  
Construction Management

**PROJECT DESCRIPTION:**  
In 2000, Joint School District No. 2 passed a bond election to fund construction of a number of school buildings. Among the schools planned is a 250,000 square foot high school to be located on the south side of Overland Road, West of Locust Grove.

This facility will house 1,800 students and contains classroom wings, gymnasium and athletic facilities, an auditorium and fine arts wing along with a state-of-the-art Media Center and Food Court facilities. Additionally complete exterior Athletic and Physical Education fields are being developed at this site.

CM Company has worked closely with the Architects, Engineers and Owners representatives to monitor and control a very tight budget and provide constructability input to the Design Team.

This building's structure is load bearing masonry walls, structural steel and concrete second floor and steel joist roof structure. Construction is estimated to take approximately twenty-seven months.

In addition to managing and constructing this project a special challenge has been posed in the requirement to obtain the maximum value for monies spent while still providing an attractive and functional school facility.
